

Head Lice
“Stopping the spread of head lice”

We will be making some changes this year to hopefully stop the spread of head lice. Children who come to school with active or live head lice will be immediately sent home. It is expected that the student will be treated. Please report to the school what method of treatment was used. The student may then return to school.

Please contact the school if your child does contract head lice and if they are missing school for this reason. Check your child’s scalp daily and consult your healthcare provider if needed. When informed, the school will inform parents of all cases.

Thanks for all your hard work and we are looking forward to a great school year.
